Games that Challenge Your Mind

By Neron Dube: Grade 4: Hearts Christian College

Do you enjoy playing games that challenge your mind? I do, that's why I like playing chess. In this article I am going to share with you why I love playing chess. Chess is a war game and it is played by using many different pieces and they are supposed to be used with their right moves.

We must encourage children and adults to play chess because it sharpens the mind and relaxes it from stress. Chess is also used for competitions at schools to know who is the smartest. Chess helps you to regain memory as you remember the moves and names of the pieces.

Chess is a fun game and instead of arguing and fighting all day long we can play chess. Chess can help us improve concentration and forget problems of life. I like chess because it is not violent or frightening. So boys and girls chess is for fun not for hurting others feelings and I encourage you to play because chess boards are not expensive to buy.

Therefore I encourage boys and girls to come and have fun at the chess club. I wish you all the best.

Barbed Wire

Purchase barbed wire that is of high quality and durability for your needs.

Two large rolls of barbed wire are shown in the foreground. The roll on the left is smaller, and the one on the right is larger. Both are made of grey metal wire with sharp barbs. In the background, a single strand of barbed wire is stretched across the frame, supported by a wooden post. The background is a blurred green field.
